

Using your UbiSurfer abroad

The UbiSurfer features inbuilt GPRS modem allowing you to connect almost anywhere in the world. What follows is a list of all countries with the necessary GPRS data coverage.

Call us on **0844 999 0990** to activate prior to leaving the UK. Be sure to allow at least 24 hours before travelling, due to there being a delay while the network de-bars the device to permit roaming. After requesting roaming, please use the device to connect to the internet a few times before departure.

Roaming is charged at 5p per minute on the nominated networks in Europe and the USA. The rest of the World is charged at 25p per minute. The bundle that we sell is £29.99 for 600 minutes which remain active for one year.

Nominated Networks
