## UbiSurfer netbook now in India

NDTV Gadgets, April 30, 2010, New Delhi

After its phenomenal success in the UK, DataWind Ltd, a leading provider of wireless web access products and services announced the launch of its ultra-portable netbook with free internet connectivity: the UbiSurfer for 'Ubiquitous Surfing' in India

The UbiSurfer offers DataWind's revolutionary free-usage model, which eliminates the complexity of getting online. With the UbiSurfer you pay for the device not the usage. For the average user, there are no monthly fees, airtime tariffs, contracts or recurring fees.

Making online access faster and simpler, the UbiSurfer allows connectivity at the touch of a button. The UbiSurfer comes bundled with 30 hours per month of free internet access for the first full year useable across India.

In comparison, at an average price of Rs 500 per month, comparative rates for internet access would cost Rs 6,000 per year, which is delivered for free on the UbiSurfer. For heavy users, unlimited internet is available for only Rs 99 per month and each subsequent year of usage is only Rs 999.

This powerful and most affordable service is powered by Tata Teleservices CDMA network across India. The UbiSurfer with a year of free-mobile internet is priced at only Rs.7,999.

The UbiSurfer is not only armed with WiFi and LAN connectivity, but also has an in-built cellular modem and an embedded SIM card that allows access to the internet anywhere a mobile phone signal is available all over India. Users are not limited to Wi-Fi hotspots and there is no need to buy a costly USB dongle to ensure connection, making internet access truly ubiquitous.

Speaking at the launch event, Suneet S Tuli, President and CEO of Datawind, commented, "Our goal was to deliver the real web, fast, free, anytime and everywhere. The UbiSurfer is another step in the Company's vision of taking the internet to the masses. This device is going to revolutionise the way we work, play, communicate and take advantage of the wireless web."
